Work Rights: Partner Work Visa – Full Working Rights in New Zealand | No Sponsorship Required

Professional Summary

Detail-oriented Junior QA Tester / QA Analyst with 4+ years of experience across enterprise IT services and government digital systems, specialising in manual testing, API testing, regression validation, defect investigation, and data integrity verification. Proven experience supporting enterprise applications, executing structured test coverage, validating REST APIs using Postman, and collaborating within Agile delivery environments.

Currently building automation testing capability using Playwright with TypeScript through hands-on portfolio projects and GitHub-based learning. Strong understanding of SDLC, STLC, Jira defect management, SQL validation, and stakeholder communication. Seeking opportunities as a Junior QA Tester, QA Analyst, API Tester, UAT Tester, or Test Analyst across New Zealand.

Core Capabilities

- Manual, Functional & Regression Testing
- API Testing & REST Validation
- Test Automation with Playwright (TypeScript)
- Requirements Analysis & Test Planning
- Defect Management & Root Cause Analysis
- Data Validation & SQL-Based Verification
- Agile Delivery & Cross-Functional Collaboration
- Stakeholder Communication & Documentation
- UAT, Smoke & Integration Testing
- Process Improvement & Operational Support

Core Skills

Testing & Quality Engineering:

Functional Testing, Regression Testing, Smoke Testing, UAT, Integration Testing, Test Case Execution, Defect Logging & Tracking, Workflow Validation, Root Cause Analysis, Test Documentation, QA Reporting

API & Automation Testing:

Postman, REST API Validation, Request Chaining, Bearer Token Authentication, JSON Response Validation, Status Code Verification, Playwright with TypeScript, Locators, Assertions, End-to-End UI Automation, Page Object Model Basics

Technical Tools & Methodologies:

Jira, ServiceNow, GitHub, SQL Basics, Microsoft 365, SDLC, STLC, Agile Scrum, Waterfall, CI/CD Concepts

Professional Experience

Systems Engineer – Tata Consultancy Services (TCS)

India | May 2022 – Apr 2024

- Performed manual testing, regression testing, and system validation for enterprise applications supporting 500+ users
- Executed end-to-end test scenarios across web-based applications
- Worked on Jira defect tracking, retesting, and verification of fixes across releases
- Validated REST API responses and backend data using Postman and SQL-based checks
- Analysed JSON responses and verified status codes for integrations
- Collaborated with developers and support teams to troubleshoot defects
- Prepared test evidence, execution reports, and QA documentation
- Supported production incidents and maintained service continuity

Digital Assistant – Government of Andhra Pradesh

India | Nov 2019 – Apr 2022

- Managed high-volume citizen service requests with daily validation of records
- Supported functional testing and UAT activities for e-governance applications
- Identified UI, workflow, and data-related issues during staging validation
- Documented defects clearly for technical and support teams
- Tested application updates to confirm fixes and identify regression issues
- Trained and supported staff members during system and process changes

Finisher – Torque Digital (Part-time)

Auckland | Mar 2025 – Oct 2025

- Performed quality checks on final deliverables to ensure accuracy and client alignment
- Maintained attention to detail and quality consistency within fast-paced workflows

Brand Ambassador – Orbit Marketing (Part-time)

Auckland | Sep 2024 – Oct 2025

- Collected customer feedback and documented campaign outcomes
- Prepared daily reporting summaries and performance updates

QA Portfolio

QA Testing Portfolio Website

Portfolio Website: <https://bindupriya0216.github.io/>

GitHub Profile: <https://github.com/bindupriya0216>

Developed a personal QA portfolio website to showcase practical testing projects, automation learning, API validation skills, and GitHub repositories.

Portfolio Highlights:

- API testing projects using Postman
- Playwright automation practice using TypeScript

- GitHub-based QA project documentation
- Structured recruiter-friendly project presentation
- Continuous learning in automation testing and modern QA practices
- Practical demonstrations of locators, assertions, UI automation, and API validation workflows

Additional Learning & Development

- Currently learning Playwright with TypeScript through hands-on automation practice and portfolio projects
- Practicing locators, assertions, waits, and end-to-end UI automation concepts
- Building understanding of Page Object Model (POM) structure and automation framework organisation
- Learning API and UI testing integration concepts for modern QA workflows
- Expanding GitHub project documentation and automation testing practices
- ISTQB Foundation Level Certification – In Progress

Education

Bachelor of Technology – Electronics & Communication Engineering

NZQA Level 7 Equivalent | 2018 – 2021

Diploma – Electronics & Communication Engineering

2015 – 2018

Certifications

- Microsoft 365 Certified
- Introduction to Playwright
- Advanced Playwright
- API Testing Practice using Postman
- ISTQB Foundation Level – In Progress
